

PAST PERFORMANCE

Project Name:

Austin Drive Extension & Devondale Drive Paving

Project Location:

City of Rochester Hills, MI

Description of Project:

Provide a complete earthwork package for the extension of Austin Drive and Devondale Drive Paving. Scope of work included all clearing, soil erosion controls, site balancing, utilities, asphalt paving and fencing. During the site balance phase of the project we brought up the roads to grade, placed and proof-rolled the aggregate base for pavement areas and stabilized undercut areas with geo-textile fabrics. A gabion-basket wall was also utilized to provide additional soil stabilization. In the final stages of the project the fencing was installed and all disturbed areas were seeded and mulched.
