

**SHIPP AVENUE
STUDENT HOUSING FACILITY
Louisville, KY**

Complete site work package for the construction of a new student housing Facility located in Louisville, KY. Contract scope of work included earthwork, sanitary sewer system installation, storm water sewer system installation and water main system installation. We also provided demolition, asbestos abatement and debris removal from site. Dynamic compaction was performed in the building pad areas to provide sufficient ground stabilization for building erection. Site was a designated Brownfield re-development project by the City of Louisville.
